Dear Amanda,

Thank you for the opportunity to provide a quotation for the completion of the draft Local Weed Management Implementation Plan for the Sydney North subregion of the Greater Sydney Region. Please find attached a quote for this work, including a proposed methodology, pricing structure and company profile.

Based on conversations with yourself and Jill McIntyre Wild Matters has determined that the majority of the work associated with this project is the development of strategic outcomes for local priority weeds (section 5 of the draft Plan).

A preliminary review of available Weed Risk Management (WRM) assessments for local priority weeds indicates there is a need to (a) perform full WRM assessments for some species, and (b) review and refine some existing assessments so that the Plan is based on technically accurate and relevant information. This will help ensure weed management investment in the North Sydney subregion is targeted and effective.

To address this our proposal includes the delivery of a one day workshop where technical experts are brought together to critically analyse existing assessments and tailor them to the region. Due to time constraints this workshop would most likely not include performing full assessments. It is expected this would have to be managed through a separate process.

Our quote is flexible and, should you chose not to include the workshop in the scope of works, Wild Matters will work with available information to progress section 5 of the draft Plan. Please note however that this may results in some gaps for species that do not have an existing assessment.

If you have any questions about our proposal please feel free to contact me on the number below.

Yours sincerely
