

**PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT
FOR THE CONTROL OF WATER PRIMROSE IN WETLANDS AND WATERWAYS
PERMIT NUMBER - PER14922**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 25 NOVEMBER 2014 TO 31 OCTOBER 2018.

Permit Holder:

CAMPBELLTOWN CITY COUNCIL
Cnr Broughton and Queen St
CAMPBELLTOWN NSW 2560

Persons who can use the product under this permit:

Persons employed or contracted by Council's and organisations of the Sydney Weed Committee who are trained and/or experienced in the preparation, use and handling of agricultural chemicals.

CONDITIONS OF USE

Containing: 500 g/L 2,4-D PRESENT AS THE DIMETHYLAMINE SALT as their only
active constituent.

Directions for Use:

Situation	Weed	Rate
WET LANDS AND WATERWAYS (inc drinking water) within the local government area within the Sydney Weeds Committee boundaries.	Water Primrose (<i>Ludwigia peruviana</i>)	Products containing 700 g/L 2,4-D Apply 90 mL product / 100L water
		Products containing 625 g/L 2,4-D Apply 100 mL product / 100L water
		Products containing 500 g/L 2,4-D Apply 125 mL product / 100L water

Critical Use Comments:

- For best results apply to plants in the vegetative/stem elongation stage.
- Apply by knapsack sprayer or power sprayer handgun with directed application to foliage, minimising run-off from the leaf surface or overspray into the water.
- For powered handguns, use only low pressure handguns (i.e. capable of generating a maximum 17 bar pressure), operate at maximum 5 bar pressure, and adjust nozzle to produce only coarse to very coarse droplets.
- Stop spraying before the herbicide droplets on the leaves begin to coalesce and run-off.
- DO NOT apply as a broadcast spray over open water.
- DO NOT apply if rain is imminent.
- Councils must consult with Sydney Catchment Authority and Sydney Water on the Maximum Residues Limit (MRL) allowed in drinking water. Council must also monitor residue levels and remedial action should be taken to prevent contamination.
- Care must be taken to avoid any harm to non-target species.
- Care should be taken when mixing to avoid water and soil contamination.
- Councils must also liaise with the Sydney Catchment Authority, Sydney Water and NSW Health before the treatment of wetlands and waterways in relation to potential

risks to public health from people drinking or otherwise coming into contact with treated water.

Jurisdiction:

NSW only.

Additional Conditions:

THIS PERMIT provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

PERSONS who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

Any unexpected or adverse effects at or downstream should be monitored, recorded and reported to APVMA and the NSW Environment Protection Authority (EPA) as soon as practical.
