BACKGROUND	<p>At meeting 9 (September 2017) the RWC considered a proposed suite of key performance indicators (KPI's) for monitoring and reporting weed management in the Greater Sydney region. See business paper 8, meeting 9.</p> <p>The proposed KPI's have been amended to incorporate changes identified in actions 6 and 7 from that meeting. However, formal adoption of KPI's and commencement of reporting was paused while the MERI Framework for RSWMP's was developed.</p> <p>A draft MERI plan was released for comment in October 2018. The final MERI plan will provide the framework for regions to report against their RSWMP. Although currently in draft form, the MERI plan does not identify specific KPI's.</p> <p>To begin monitoring and evaluating the implementation of the RSWMP, it is proposed to commence reporting against agreed KPI's for 2018/19.</p> <p>In addition to the proposed KPI's, it is proposed to monitor regional LCA compliance with the Biosecurity Act by reporting annually;</p> <ul style="list-style-type: none"> • No. of LCA's with Authorised Officers appointed under the Act, • No. of LCA's with proactive inspection/surveillance programs • No. of LCA's submitting weed management data to the BIS
