

## Greater Sydney RWC Meeting 17: BUSINESS PAPER

Agenda Item 12

### Review of Greater Sydney RSWMP

#### ATTACHMENTS

#### BACKGROUND

The Greater Sydney Regional Strategic Weed Management Plan (RSWMP) was released in June 2017 and revised in September 2019. The revised version corrected several minor errors and added or amended priority weeds listed in Appendix 1.

A more comprehensive mid-term review is due to be undertaken in 2020.

It is proposed that the review will focus on regional specific content, including:

- Acknowledgements and Chair's foreword
- Weed management in the region (chapter 3)
- Implementation (chapter 6)
- Amendments to priority weeds (appendix 1)

It is proposed that the review will also consider:

- Inclusion of the GBD Decision Support Tool/diagram (chapter 2)
- Restricting the number of priority weeds (appendix 1), and
- The merits of retaining the list of "Other weeds of regional concern" (appendix 2)

It is recommended that the review is coordinated by the Executive Officer and overseen by a panel comprised of 3 members of the RWC.

The review is to be concluded by September 2020.

**FOR  
ACTION/DECISION/NOTING**

**Decision**

**DECISIONS REQUIRED BY  
RWC MEMBERS**

- 1. Endorse the proposed approach to review of the RSWMP**
- 2. Confirm nominations for members of the review panel**
